Fair Field	https://www.fairfield.ca.gov/government/city-departments/community-development/planning-division/development-activity?locale=en
California Bid Network	https://www.californiabids.com/

For Identifying the reliable data sources, I have used the manual as well as Language Models. In which I have preferred data that is present in Tabular form and also used Chat-GPT and Google Gemini.

The Prompt I used for selecting the data was

“Identify and shortlist 5-10 reliable data sources from the given list which contains data of construction and infrastructure projects and tenders in California. Give Preference to the website which have been recently modified”
